

Experts in Life Safety and Security Systems since 1977

Bass-United. Your Go-To Team For Life Safety and Security Solutions.

Bass-United began in 1977 with one man and his passion for life safety and technology. From humble beginnings we have grown to a cutting-edge company at the forefront of the fire and security industry. As one of the premiere life safety providers, we carry the highest accreditations in the industry. We continually deliver the life safety solutions customers count on to protect their people and property.

We are a full-service provider specializing in sales, installation, maintenance and monitoring of commercial fire alarms, burglar alarms, fire sprinklers, access control, CCTV systems, medical alert, intercoms, public address and communication systems. Our expertise and experience has afforded us the opportunity to install and maintain systems where keeping you safe matters the most, such as hospitals, air-craft hangars, schools, assisted living facilities, condominiums, residential, high rises, malls and more.

At Bass-United, we value customer loyalty and strive to maintain long term relationships. Many of our current customers have been with us from the very beginning. Our large 12,500 square foot facility, top technicians, and versatile fleet can accommodate any life safety challenge throughout Florida, Georgia and the Caribbean Islands.

When you've got fire and security concerns and no time for trial and error, turn to the pros at Bass-United. We're here to give you the talent, technology, service and assurance that safeguards property, protects people, and creates peace of mind.

Fire Alarms

When it comes to life safety solutions, maintaining and servicing reliable fire alarm systems is crucial. Our top team of technicians is UL and NICET certified, factory trained and state licensed. Bass-United is a factory direct service and installation contractor with an unparalleled knowledge of fire and life safety systems.

We carry a full line of fire alarm panels and parts. What's more, we continually train our technicians in the latest products, installation techniques and software.

The go-to team at Bass-United designs, installs, tests, inspects, services and monitors a large range of life safety systems to protect all types of facilities. We can meet your needs from spare parts to full installations, small conventional systems to large addressable networked systems, regardless of the manufacturer.

Let our in-house design team value engineer your system. We ensure that your system will comply with the National Fire Protection standards, state requirements and local codes.

Central station monitoring when paired with a fire alarm system provides around-the-clock safety and assurance. Whether it is internet, wired or wireless we have a solution at an economical price combined with a seamless transition and no downtime. We offer customer friendly operators as well as a valuable online management portal that allows you to remotely view and update your alarm information from the convenience of your home or office.

Card Access / Access Control / Telephone Entry

Bass-United's Card Access/Access Control systems are robust, full featured software packages designed to take advantage of cutting edge technologies. We provide access control solutions from stand-alone through networked systems in all of today's major markets, including residential, condominiums, government, health care, education, airport properties, offices and more.

The scalable architecture and flexibility of our product lines present an easy to use and implement solution for any size facility. Our access control systems include the components necessary to make installations and system upgrades as simple as possible. Card user management, physical door control, wireless electronic locks, event monitoring and CCTV surveillance can all be performed locally or from a remote computer via the Internet. These features allow building managers the freedom and flexibility to monitor their properties from anywhere in the world.

In addition, Bass-United's family of products suit virtually every security, telephone entry and access control application, from single door apartments to large commercial applications with multiple sites. Our telephone entry systems are feature-rich, including full voice response, access control integration, wireless communication options, remote door open capabilities, and much more.

Security Systems / Video Surveillance

Intrusion and burglar alarm security systems are an investment in protection... and peace of mind. Bass-United specializes in the design and installation of commercial grade security systems that are reliable, efficient, and easy to use. With today's unpredictable dangers and risks, security systems are becoming more important than ever before. Bass-United understands the importance of keeping your property safe and secure. Our sophisticated video analytics can enhance your current business practices. The software benefits range from counting the number of people visiting your business to helping manage your assets.

Commercial security system installations can be designed to meet any budget, including basic alarm systems which monitor doors and windows, and systems that are fully integrated with cameras and access control. The Bass-United team has installed commercial security systems in all major markets, including business offices, government buildings, casinos, health care facilities, educational institutions, airports, offices, condominiums and more.

We're one of the select few Panasonic IP Pro Resellers, specializing in the design and installation of Advanced High Definition Camera Systems. We pride ourselves on delivering high quality professional grade systems with exceptional customer service for every budget. Bass-United's CCTV systems take advantage of advanced technologies to provide security solutions from Small Analog Systems and Mid-Size Hybrid Systems through Large IP Systems.

Fire Sprinklers

Properly installed and maintained automatic fire sprinkler systems help save lives. Because fire sprinkler systems react so quickly, they can dramatically reduce the heat, flames and smoke produced in a fire. Whether you're installing a new fire sprinkler system or retrofitting an existing one, the Bass-United team will work closely with you to design and budget a system that is code compliant, cost effective and easily expandable to protect your investment through changing times.

Our technicians are fully licensed experts in installation and service of dry pipe, wet pipe, pre-action systems, hydrants, backflows, and fire pumps. We offer routine fire suppression system service and maintenance of all your equipment no matter how big or small the project. Our service department stands ready to provide emergency service 24 hours a day, 7 days a week, and central station monitoring is available to detect issues and prevent major problems. Keeping your life safety and fire sprinkler systems at peak efficiency through Bass-United is the smart solution.

Healthcare

Caregivers today are required to provide higher operating efficiency while simultaneously offering more personalized patient-centered care. That's why successful health care organizations are putting the latest technology to the service of a timeless goal: better communications. By getting the right information to the right people at the right time, state of the art communication systems installed and serviced by Bass-United help providers devise more flexible and effective care modules for higher patient satisfaction and lower costs.

Media Systems

Pro Audio-Visual. Bass-United's commercial audio systems deliver the highest quality. These low cost options provide all the necessary features in a simple building block format, making it easy to upgrade as your facility expands. Our in-house sales and design team have the experience and flexibility to configure a system with a range of uses such as paging, background music, security, and evacuation instructions.

Intercoms. Bass-United's intercoms create new capabilities to instantly communicate and connect between rooms and multiple buildings. Businesses and residences use intercoms to locate and speak with individuals in any part of a building, page individuals over the phone, make emergency announcements and obtain voice verification before allowing building access. With new emerging technologies, individuals have continuous means of communication in parking lots, elevators or other unmanned locations.

Background Music. Background music provides ambiance, style, energy and superior sound – from budget-friendly setups to elaborate customized systems. Bass-United can install and service audio equipment that will enhance your customers' and employees' experience in a format that makes sense to you.
